DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/2/04 has been entered.

103 Rejections Withdrawn

The rejection of claims 1-3, in so far as they read on the species defined in the Final Rejection, has been overcome by applicant's amendment. The amendment adds an exclusionary proviso removing the cited prior art compound from the scope of the claim.

Allowable Subject Matter

The elected species, its obvious variant and the compounds when $Ar_1 = -PHSR_4$ remain allowable. The search was therefore expanded as called for under current Office Markush practice, a compound-by-compound search, to include a single additional species. That species is defined when: $Ar_1 = \text{phenanthrene}$ and $R_1 = C_{1-12} \text{alkanoyl} = -C(O)CH_3$. A rejection follows.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, in so far as they read on the species defined above, are rejected under 35 U.S.C. 102(b) as being clearly anticipated by *Organic Mass Spectroscopy* (1973), 7(12), p. 1337-43 (CAPLUS abstract). The reference teaches applicant's compound: RN=51873-99-5.
